Group Risk Analytics

Powerful risk predictions, driven by innovation, for an exceptional client experience

Win in the market

With Optum® Group Risk Analytics (GRA), payers unlock rapid risk insights and predictive accuracy, enabling competitive premium rates on groups with favorable risk profiles.

Leaders trust GRA to:

- Mitigate the risk associated with entering a new market
- Speed up the underwriting process
- Guide discussions on stop loss needs
- Inform tiering decisions for pooled arrangements like professional employer organizations

The opportunity

Risk prediction

Improve prediction of future risk with Optum Symmetry predictive models and an unparalleled medical and pharmacy claims data syndicate

5:1 to 10:1 return on investment using GRA versus manual rating alone, based on recent studies*

Client focus

Outstanding customer experience with a team of actuaries and health industry experts sharing a deep commitment to the success of our clients

100% client satisfaction, according to recent annual survey of clients

Market-driven evolution

A product roadmap reflective of our commitment to supplying our clients with meaningful insights and powerful predictions

New risk insights based on medical and pharmacy data

*Based on client data 2024–2025.
