

Group Risk Analytics

Simple, secure, streamlined. A prospective group risk assessment tool.

Win in the market

Optum® Group Risk Analytics (GRA) enables payers to better assess the risk of prospective employer group customers in minutes, using de-identified third-party data and proprietary risk scoring.

Why GRA

- Powerful group-level metrics leverage an unparalleled data syndicate of medical, pharmacy and specialty pharmacy claim data with broad and dense nationwide coverage
- Sleek, fast and intuitive software that is easily integrated into existing workflows
- Outstanding customer experience with a team of actuaries and health industry experts sharing a deep commitment to the success of our clients
- Competitive pricing with volume-based discounts and other discounts and credits available

Key questions leaders are asking themselves today:

- How can we increase the accuracy of our new business risk assessment?
- How can we speed up our underwriting processes?
- Are there tools that can help us mitigate the risk associated with entering a new market?
